

## NEWS RELEASE

Perth, Western Australia, July 4th, 2011 - Arbortech Pty. Ltd, an innovative Australian company known for its range of innovative technologies, today announced the opening of a new office in Finnentrop, Germany.

Sven Blicks, General Manager of Arbortech Pty. Ltd, commented, "Our range of tools and accessories have been available through a wholesaler in Germany for many years. The opening of our new German office with a dedicated sales team means that we can service the growing demand for our products in the region and be further able to support our valued dealers and customers".

The German office joins Arbortech's existing North American and Australian offices and will be managed by Mr Udo Arens.

### **About Arbortech**

Since it was incorporated in 1988, Arbortech have been engaged in the research, development and manufacture of innovative technologies. Primarily known for their revolutionary Woodcarver™ blade and award winning AS170 Brick and Mortar Saw, Arbortech also gained international recognition for its development of the Airboard.

Since its first product release, Arbortech has gained an international reputation for an innovative approach, engineering excellence and cutting-edge technologies in a already well-established industries.
